EXPERIENCE

NOKIA | DATA SCIENCE INTERN

Aug 2024 – June 2025 | Noida, India

- Built and deployed a modular anomaly detection framework for 2G/3G/4G RAN KPIs, automating model pipelines via Cloud Composer and Airflow—reduced manual monitoring efforts by 60% and accelerated anomaly response time.
- Delivered 5+ end-to-end ML solutions (e.g., rigger prediction, spare parts forecasting), automating pipelines and training workflows to enable proactive telecom operations and reduce manual intervention.
- Easily migrate 100K+ records from BigQuery to AlloyDB, implementing encryption and data masking, reducing data privacy risk by 80%, enabling safe internal demos with strict access control.

CELEBAL TECHNOLOGIES | DATABASE AND SQL INTERN

Jun 2024 – Aug 2024 | Remote, India

- Completed a 6-week intensive SQL training, mastering data querying, transformation, and relational database management skills.
- Designed and optimized ETL pipelines to process over 1M+ records daily, improving data ingestion speed by 35% and ensuring high data integrity for downstream analytics.

PROJECTS

FLIGHT PRICE PREDICTOR | GITHUB LINK

Python, Scikit-learn

- Built a Random Forest Regressor to predict flight prices with an R^2 score of 0.87, enabling accurate, data-driven pricing decisions for the airline industry.
- Applied advanced feature engineering and preprocessing techniques, boosting model performance and supporting revenue optimization in dynamic pricing scenarios.

ANIMAL ALLERGY SAVING SYSTEM | GITHUB LINK

Python, Tensorflow, Streamlit

- Developed a CNN using TinyVGG to classify pet images into 37 categories with data augmentation, and deployed the model via Streamlit for interactive use.
- Integrated Gemini API with the classifier to deliver breed-specific pet food allergy insights, enhancing pet health recommendations.

FACT CHECK AI – LLM BASED CLAIM VERIFIER | GITHUB

LINK

Python, FAISS, Mistral, Streamlit

- Developed an AI powered fact-checking tool that retrieves relevant evidence using Sentence Transformers and FAISS, allowing users to verify real-world claims interactively.
- Integrated the Mistral large language model via Ollama to analyze retrieved facts and provide natural language verdicts — identifying claims as Supported, Refuted, or Unverifiable with reasoning.

ACHIEVEMENTS

Received Dean's Excellence 2025 for outstanding academic performance.

Secured 3rd place at Project Expo 2024.

Won multiple inter-college competitions in debate and cultural events.

EDUCATION

MANIPAL UNIVERSITY JAIPUR

B. TECH IN COMPUTER SCIENCE

2021 - 2025 | Jaipur, India

CGPA: 8.63

JAGRAN PUBLIC SCHOOL

AISSCE 12TH

2020 - 2021 | Lucknow, India

Per: 95.2%

JAGRAN PUBLIC SCHOOL

AISSE 10TH

2018 - 2019 | Lucknow, India

Per: 95.6%

CODING PROFILES

➔ LeetCode : 200+ problems solved

➔ GeeksforGeeks : University Rank 176

➔ HackerRank: 5 star

SKILLS

PROGRAMMING

• C++ • Python • SQL

LIBRARIES/Frameworks

• Pandas • NumPy • Scikit-learn

• Matplotlib • Seaborn

CLOUD/DEVOPS

• Google Cloud Platform (GCP)

• BigQuery • Vertex AI

• Cloud Storage • Cloud Composer

• Docker • Cloud Run

TOOLS

• Git & Github • Looker Studio

• Google Colab • Apache Airflow

SOFT SKILLS

• Agile Collaborations • Problem Solving

• Self-Directed Learning

• Communication • Technical Storytelling

• Emotional Intelligence

COURSEWORK

Data Structures and Algorithms

Object Oriented Design

Operating System

Database Management Systems (DBMS)

Machine Learning

Artificial Intelligence (Gen AI)

Natural Language Processing (NLP)

Cloud Computing

Statistical Analysis
